

Access policy:

- i. Users can register on the platform using a form; the Administrator checks user information and then has to manually accept users.
- ii. Users can see their own data and data other users share with them.
- iii. Users can control access to their data in various ways and at different granularities (datasets, collections and spaces).

Terms of use:

It is recommended that all uploaded datasets should respect the FAIR principles: users can search, tag, annotate data at various granularities. Metadata can follow the CIDOC-CRM RDF, or ARC2 triple store, ISBD –M, and UNIMARC standards. Metadata standardization, e.g., Dublin Core, should be applied.

Privacy policy:

Service follows the EU GDPR principles. Users' personal data are not shared or processed by anyone. Users can process their personal data and information, and if requested all of their personal information can be removed from the server.
